

Arduino

Digital extension terminal can be powered by internal 5V and external power
6sets of PWM connector

Input voltage: connect USB, or DC7V~12V

Output voltage: 5V DC, 3.3V DC

Atmel Atmega: 168-20AU processor

Supports 2 channel motor drive, the maximum current is 2A

Supports both USB power and external power

Processor TX/RX connector

AREF connector

USB connector

Arduino PCB size: 90mmx72mm

Please download at least Arduino 0012 version for program environment
