

LBD Geared Motor

The LBD geared motor from DAGU is our Little Black Duck servo with the control circuit removed. This gives you a small, strong, lightweight geared motor in a standard miniature servo housing with a ball raced output shaft that is perfect for small robots.

DC Voltage:	3V - 6V
No load current at 5V:	110mA \pm 10%
Stall current at 5V:	650mA \pm 10%
Speed (No load at 5V):	100RPM \pm 10%
Torque at 6V:	2Kg/cm maximum
Weight:	9.1g
